- PVD light bronze

INC

by Piet Boon

Smooth curves and an excellent grip is what characterizes our INC hardware series by Piet Boon. Starting out as a circular cylinder volume, the INC took shape after flattening the circle and tapering the end. This provides the handle with a smooth inclination, to which the INC is named. The INC door handle has won the Red Dot Design Award 2019 in the 'Product Design' category. The Jury commented that 'the ingenious design of the INC door handle blends a flowing yet powerful design vocabulary with pleasing haptic properties'. The winning door handle is part of the total concept collection consisting of door, window, and furniture fittings alongside other accessories. The INC series is available in two finishes, including our latest PVD satin black and satin stainless steel.

Design philosophy: Balancing functionality, aesthetics and individuality.

Studio Piet Boon and FORMANI believe in the beauty of simplicity combined with quality and functionality. We share the vision that doorware is an essential part of any project and gives a first impression when entering a room. It's the first handshake with the building. The clean lines and geometric designs of the FORMANI by Piet Boon collections are pure, iconic, recognizable, and yet neutral. The models originated from the vision to explore a different design language, but one which is in harmony with the identity of Studio Piet Boon.

Brand story

FORMANI has evolved considerably over the last few decades – from a Dutch family business to an internationally renowned designer brand, from door handles to total design concepts, from product development to collaborations with world-class designers. It was an evolution driven by pure ambition and courage. Our motto, ‘Obsessed with details’, epitomizes everything we do, from product to process, from strategy to service. Because it is these details that make the difference between good and perfect. At FORMANI, good is the enemy of great.
